

ASSIGNMENT 2: DATA EXPLORATION

TASK 1: Handling Missing Values

Check for missing values in the 'Price' column. How would you handle products with missing price information?

- Used COUNTBLANK to find the number of missing prices.

The screenshot shows an Excel spreadsheet titled "Assignment 2 - Raw Data (2) - Excel". The formula bar displays the formula `=IF(ISBLANK(D2),"Blank",D2)`. The spreadsheet contains a table with the following columns: Product ID, Product Name, Brand Name, Price (\$), Quantity, Category, ISBLANK Price, Imputed Price, and Imputed Category. The data is as follows:

Product ID	Product Name	Brand Name	Price (\$)	Quantity	Category	ISBLANK Price	Imputed Price	Imputed Category
28-JAN-US	laptop	Dell	1000	30	Electronics	1000	1000	Electronics
15-FEB-US	Sneakers	Nike	80	15	Fashion	80	80	Fashion
03-MAR-US	Coffee Maker	Keurig	130	40	Kitchen	130	130	Kitchen
11-APR-US	smartphone	Samsung	900	25	Electronics	900	900	Electronics
22-MAY-US	Backpack	North Face	70	20		70	70	Accessories
07-JUN-UK	Headphones	Sony	45	45	Electroni	Blank	140	Electroni

13-APR-CA	Toaster	Hamilton	40	10	Kitchen	40	40	Kitchen

- Used ISBLANK to identify the blank cells.

The screenshot shows the same Excel spreadsheet as above, but with the formula bar displaying `=COUNTBLANK(D2:D35)`. The spreadsheet data is identical to the previous one.

- Calculated the **median price** using the **MEDIAN** function and filled the missing prices with the median value.

Product ID	Product Name	Brand Name	Price (\$)	Quantity	Category	ISBLANK Price	Imputed Price	Imputed Category
28-JAN-US	laptop	Dell	1000	30	Electronics	1000	1000	Electronics

13-APR-CA	Toaster	Hamilton	40	10	Kitchen	40	40	Kitchen

- Used the median to avoid the effect of **extreme prices**.
- Observed that prices were generally **concentrated in the middle** of the dataset.

If there are products with missing categories, propose a strategy to impute or deal with these missing values effectively.

- Used Filter to identify the blank cells in the Category column using **Ctrl + Shift + L** to apply/remove filters.

- Compared the products with similar product names and brands and entered
- Manually entered the most appropriate category based on similar products.

TASK 2: Correcting Inconsistent Data

Identify any inconsistent text formats present in the "Product Name" column.

- Observed that some Product Names started with capital letters, while others started with lowercase letters.
- Used the **PROPER** function to make the text format consistent.
- Used the **TRIM** function to remove any extra spaces.

Identify any typos present in the "Category" column.

- Checked the Category column for errors and inconsistencies.
- Identified some blank cells and spelling mistakes in the category names.
- Corrected the spelling mistakes to make the category names consistent.
- Filled the blank cells by comparing them with similar products.

Use the find and replace function to standardize the text formats in the "Product Name" column and fix any typos or misspellings in the "Category" column.

- Used the Find and Replace function using the shortcut **Ctrl + H**.
- Standardized inconsistent text in the Product Name column.
- Corrected typos and spelling mistakes in the Category column.

Count: 31

TASK 3: Removing Duplicates

Identify any duplicate rows within the dataset based on the entirety of each row, and remove them if any.

- Selected a **unique column** to check for duplicate entries.
- Used **Data → Remove Duplicates** in Excel.

- Identified and removed duplicate values from the dataset.

Count: 35

TASK 4: Splitting and Merging Data

Split the "Product ID" column into two separate columns for " Manufacturing Date" and "Country Code". Remove unnecessary characters, if any.

- Created separate columns for Manufacturing Date and Country Code.
- Used the **LEFT** function to extract the date and month from the Product ID.

The screenshot shows an Excel spreadsheet titled "Assignment 2 - Raw Data (2) - Excel". The formula bar displays the formula `=LEFT(A2,6)` in cell J2. The spreadsheet has columns A through P. Columns A through E contain the original data. Columns F through H contain the same data as A through C, but with some text changes (e.g., "Category" instead of "Product Name"). Column I contains the date extracted from the Product ID using the LEFT function. Column J contains the country code extracted from the Product ID using the LEFT function. Column K contains the Product Brand. The data is as follows:

	A	B	C	D	E	F	G	H	I	J	K	L
1	Product ID	Product Name	Brand Name	Price (\$)	Quantity	Category	Cleaned Product Name	Cleaned Category		Manufacturing Date	Country Code	Product Brand

- Used the **DATEVALUE** function to convert the extracted text into a proper date and formatted it as DD-MM-YYYY.

The screenshot shows the same Excel spreadsheet as above, but with the dates in column I converted to a proper date format using the DATEVALUE function. The formula bar displays the formula `=DATEVALUE(I2)` in cell J2. The dates in column J are now in the format DD-MM-YYYY. The data is as follows:

	A	B	C	D	E	F	G	H	I	J	K	L

Ready Accessibility: Good to go

● Format the "Manufacturing Date" column to display dates in the "DD-MM-YYYY" format.

- The Manufacturing Date column was already formatted as DD-MM-YYYY during the previous task.

TASK 6: Conditional Formatting

Apply data bar or color scales conditional formatting in the "Price" column.

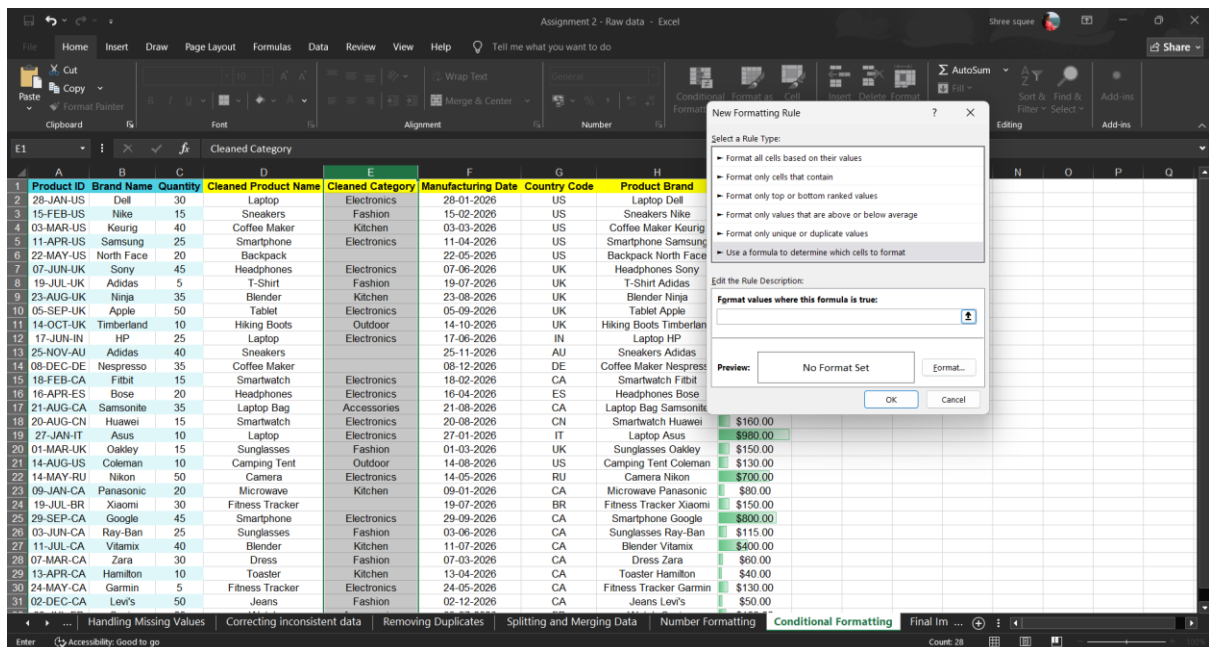

- Selected the Price column.
- Went to **Home** → **Conditional Formatting** → **Data Bars**.

- Selected a data bar style to visually represent the price values.

Create a custom rule for conditional formatting in the "Category" column to highlight cells where the category is "Electronics."

- Selected the Category column.
- Went to **Home** → **Conditional Formatting** → **New Rule**.

- Created a custom rule to highlight cells containing "Electronics".

The screenshot shows an Excel spreadsheet with a table of products. The columns are: Product ID, Brand Name, Quantity, Cleaned Product Name, Cleaned Category, Manufacturing Date, Country Code, and Product Brand. The 'Cleaned Category' column (E) contains various product categories like Electronics, Fashion, Kitchen, etc. A custom formatting rule is being created to highlight cells in column E that contain the text 'Electronics'. The rule is named 'Electronics' and uses the formula '=E2=\"Electronics\"'. The preview shows a red background.

- Selected a colour to highlight the matching cells

The screenshot shows the same Excel spreadsheet as before, but now the cells in column E that contain the text 'Electronics' are highlighted in red. The 'Edit Formatting Rule' dialog box is open, showing the 'Format values where this formula is true' option. The preview shows a red background.
